Overview

A VPAT helps organizations conform to the law while opening the door for businesses to sell to government agencies. It is a compliance tool that helps your company grow as well as shows where it stands from a web accessibility viewpoint.

Follow this [step-by-step process](#) to get a free custom quote.

What is a VPAT?

VPAT stands for Voluntary Product Accessibility Template. It's based on the WCAG or Web Content Accessibility Guidelines and it assesses a website's accessibility.

It's designed to comply with the legal requirements outlined in [Section 508](#).

To learn more about our VPAT services [press here](#).

What is an ACR?

The "T" in VPAT stands for Template. Once the template is filled out, it becomes an ACR or Accessibility Conformance Report.

So the difference between the two is the VPAT is the empty form, while the ACR is a completed VPAT.

Do I need a VPAT?

If any of the following applies to your organization you require a VPAT.

U.S. government agencies

(Municipal, State, and Federal)

Agencies under government contract

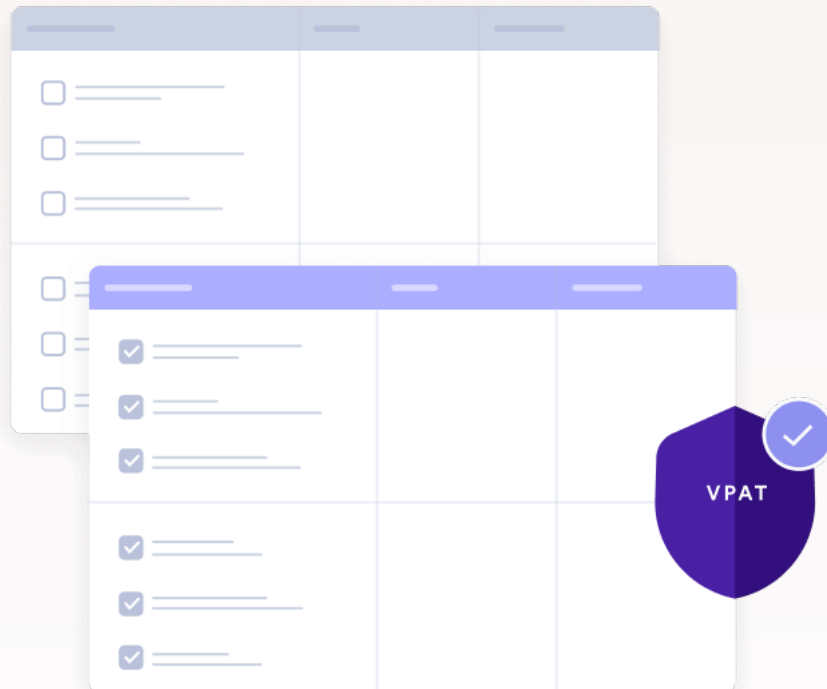

Organizations that receive U.S. federal funding

(Universities, Healthcare companies, etc...)

What does a VPAT/ACR look like?

[Press here](#) to see an example of a VPAT/ACR. The document begins by describing the evaluation methods used and names accessiBe as the company that provided the report.

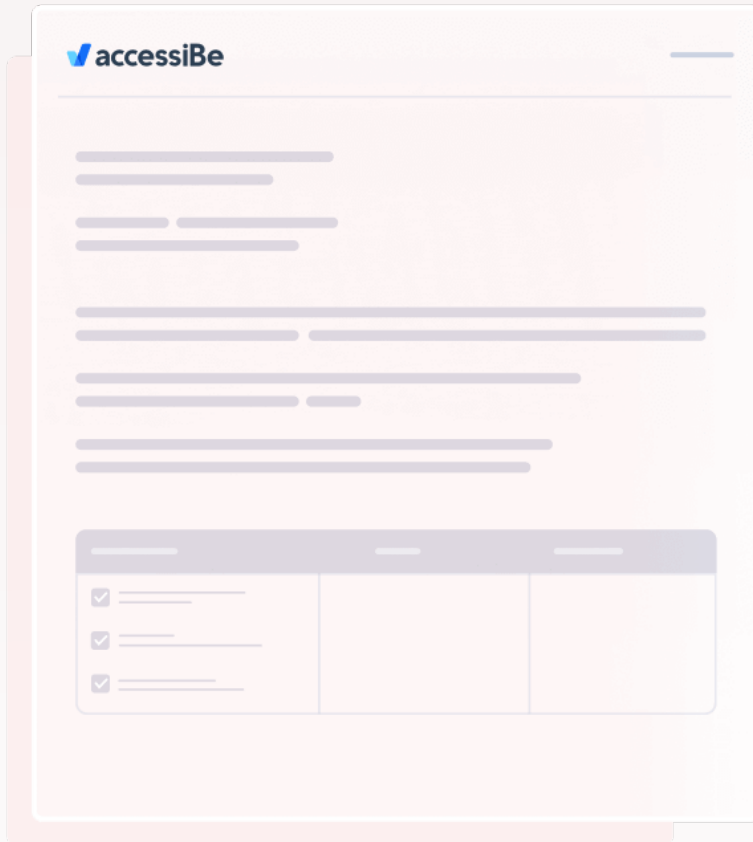

WCAG level

Our VPATs are carried out in compliance with the WCAG 2.0 AA guidelines, which reflect today's best practices surrounding accessibility standards. The **Description** section also outlines the overall accessibility of the website in question.

Terminology

Supports indicates an accessibility level that meets the WCAG standard. **Partially Supports** is an indication that only some functionality meets the WCAG standard. Finally, **Does Not Support** lets the reader know that most of the functionality does not achieve the WCAG 2.0 AA standard.

Section 508

Our reports are tailored for web products of all types according to applicable standards under Revised Section 508.

Remarks and Explanations

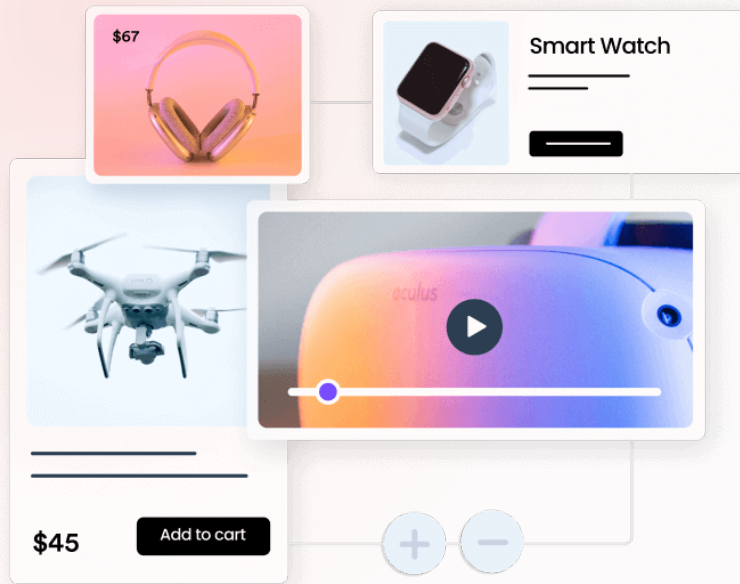

accessiBe's VPAT/ACR includes a Remarks and Explanations column, which will help give the website owner some insights into the accessibility issues discovered during the reporting process.

Legal Disclaimer

The last page of the report includes a section where you can add a legal disclaimer.

How do you determine your pricing?

We base our pricing for VPATs on the scale and complexity of your website's content and structure. Once you submit a quote request through our portal, one of our web accessibility specialists will evaluate your site and classify it into one of four pricing categories. Your quote will be posted on the portal within one business day.

How much does a VPAT cost?

The cost of a VPAT is determined by which of the four categories your site falls into.

Elemental \$5K

Typical \$7.5K

Substantial \$10K

Custom: A custom quote will be generated for such websites and will take roughly three business days.

Ask us about the discounted pricing related to our annual VPAT subscriptions.

[Press here](#) for instructions on how to get a free custom quote.

Will a VPAT help me make my website more accessible?

A VPAT/ACR is more of a compliance tool that will give you a general sense of the overall accessibility of your website rather than a detailed audit that could guide an accessibility improvement initiative.

If your objective is to improve the accessibility of your website, then our line-of-code-by-line-of-code Expert Audit is designed to identify all the accessibility gaps on a website and give you suggested code fixes or linked resources to help resolve many of those issues.

Once you have made the suggested improvements we will conduct the VPAT which will reflect the high level of accessibility you have achieved. **Ask us about the cost-effective pricing we offer for our Expert Audit & VPAT bundle.**

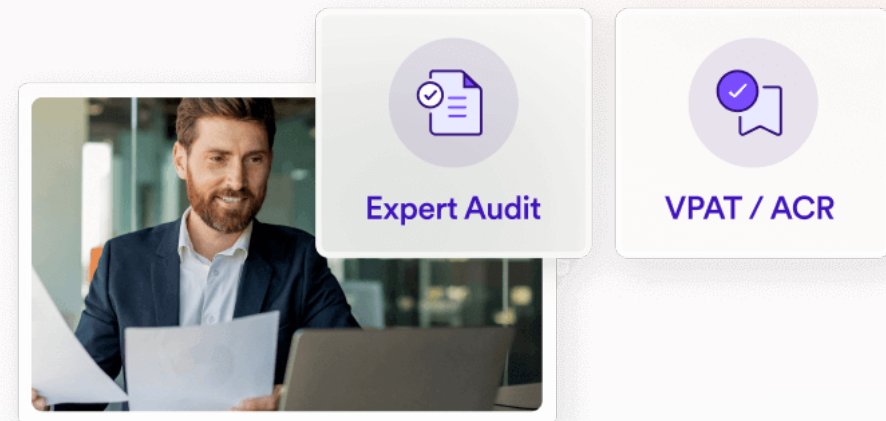

Do you offer VPATs for mobile apps?

Yes. We offer VPATs for both Android and iOS apps.

Do I need to fix all of the issues listed in my VPAT/ACR?

In most cases, the minimum requirement is to have an up-to-date completed VPAT/ACR, though some government agencies now require VPAT/ACRs that show at least partial accessibility for every criterion.

Industry best practice is to run an Expert Audit first, make the suggested accessibility improvements to your website, and then run the VPAT to generate an ACR that shows how accessibility is a strength of your organization and a competitive advantage.

How often should I update a VPAT?

01 After the redesign of your website.

02 Annually.

Ask us about our pricing discounts for **annual subscription plans**.

What is the turnaround time?

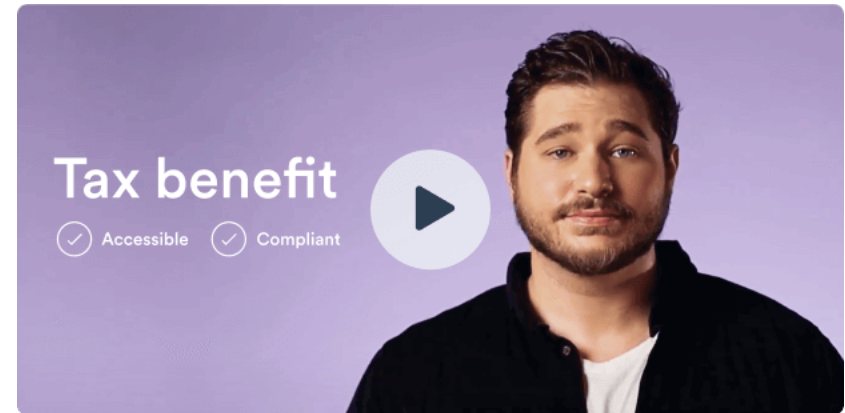

Approximately 10 business days. The exact turnaround time will also depend on the scope and complexity of the work. You will be given a forecasted project completion date with your free custom quote.

In the meantime, we can supply you with a **Letter of Engagement** while we work to meet your **Secured Deadline**. Ask us for details.

Are there any tax incentives associated with these expenses?

Companies in the U.S. with less than 30 employees or less than \$1M in annual revenue may qualify for significant Federal tax incentives related to accessibility expenditures such as a tax credit of up to \$5,000.

Why should I get a VPAT?

01

Access to Government Funding and Government Contracts. Having a VPAT/ACR gets you the documentation you need to continue to receive that federal funding without delay or go after government contracts to grow your business.

02

It's the law. If you are a government agency, receive federal funding, or sell to the U.S. government you need an VPAT/ACR to conform with Section 508.

03

Assess the accessibility of your website. Get an indication of where your website stands from an accessibility standpoint.

Follow this **step-by-step** process to get a free custom quote.

Why should I choose accessiBe for my VPAT?

Our **competitive pricing initiative** assures our clients that our pricing is either comparable or better than what they will find elsewhere. Share a competing quote with us and we will bring it to our team to see if we can match it or beat it.

Having a VPAT from an **industry leader** like accessiBe ensures the objectivity and accuracy of the process and demonstrates your commitment to web accessibility.

Our VPAT process is fast and efficient. We can supply you with a **Letter of Engagement** while we work to meet your **Secured Deadline**. Ask us for details.
